

List of posters EAGS2026

Poster	TITLE	SPEAKERS
Poster #01	Genome-wide association and genomic prediction for agronomic traits in the yellow mealworm (<i>Tenebrio molitor</i>)	Rocha Ferreira Lucas
Poster #02	QTL mapping of key postharvest quality traits in diploid and triploid banana populations	Aresi Margot
Poster #03	Cracking the code in eggshells: ancient DNA recovery	Roy Priyadarshini
Poster #04	A phylogenomic investigation of ancestral gene exchanges between Eukaryotes and Nucleocytoviricota	Churcheward Benjamin
Poster #05	Alpha-solenoid proteins involved in organellar gene expression	Lafontaine Ingrid
Poster #06	Analysis of de novo gene in diatoms	Boutheroue-Desmarais Alix
Poster #07	Comparative plastome analysis reveals evolutionary patterns in the parietal clade of Malpighiales	De Mestier Astrid
Poster #08	Differential dynamics of <i>Wolbachia</i> and its pWCP plasmid in <i>Culex</i> mosquitoes	Brunner Alice
Poster #09	Rooting Biases and Underlying Premises in Wood-Ljungdahl Pathway Phylogeny	Lonigro Manuel
Poster #10	KmerCity and AdmixKmer: repeated K-mers-based tools for analyzing ancestry in complex admixed genomes	Garsmeur Olivier
Poster #11	Identification and Functional Characterization of Genetic Module Associated with Trichome Development in Cotton	Wang Heng
Poster #12	Application of adaptive sampling for selective long-read sequencing in marine dietary metabarcoding: a case study.	De Oliveira Magalhães Carolina
Poster #13	Comparison of taxonomic assignment tools to species and strain-level and application to piglets gut microbiota with different diet (human milk vs infant formula)	Angevin Lune
Poster #14	Omics-Based Exploration of the Microbiome and PHA-Producing Halophiles from Tunisian Hypersaline Environments.	Karray Fatma
Poster #15	Paleogenomic analysis of a ~7,300-year-old Iberian goat skin and 16th-century Italian parchments and papers	Robinet-Guyet Zoé
Poster #16	The HerbaSoil project: unravelling two centuries of soil microbiome evolution using herbarium collections	Grasso Gianluca
Poster #17	A metagenomic and transcriptomic study of RNA virus-diatom interactions	Thiriote Florian
Poster #18	Identification of microeukaryote genes associated to corals holobionts with a metatranscriptomics approach	Zallio Mathieu
Poster #19	Partial draft genome of amoebic gill disease causative agent, <i>Neoparamoeba perurans</i> , Young et al. 2007 and associated bacterial microbiota	Campos Paola
Poster #20	Effect of DNA Extraction Protocols on Pig Tonsil Microbiota Profiling	Hercouet Katell
Poster #21	When Viruses Meet the Gut: Trophic and Microbial Correlates of Coronavirus Infection in Bats	Van Leeuwen Pauline
Poster #22	Commercial soil amendments trigger soil dysbiosis and impair Douglas fir reforestation	Darriaut Romain
Poster #23	From Vision to Impact: NGS4ECOPROD – A Horizon Europe Twinning Project Advancing Genomic Innovation for Sustainable Bioproduction – A Case Study on Sporeless Biopesticides	Zribi Zghal Raida
Poster #24	The sea urchin serves as a new toxicological model to elucidate the effects of chlordecone cocktail pesticides	Paul Calli

Poster #25	Isolation and identification of antibiotic resistant bacteria and genes from soil. The effect of animal manure use as a fertiliser on antimicrobial resistance in an Irish beef and sheep farm.	Joyce Brian
Poster #26	Microbial diversity in Parisian urban soils: the impact of tree species and soil characteristics	Hecquet Amandine
Poster #27	Tracking Antibiotic Resistance on Slurry-Exposed Soil for Monitoring of Antimicrobial Resistome Changes	Ryder Stephen
Poster #28	Annotation transfer in pangenome graphs	Marthe Nina
Poster #29	Individually assembled genomes from field-collected Spodoptera frugiperda reveal that intact gene copy number variants from retrotransposition are retained under relaxed selection	Nam Kiwoong
Poster #30	PanGBank: a Database of Pangenome Graphs for Comparative Microbial Genomics	Mainguy Jean , Calteau Alexandra
Poster #31	Savanache : Interactive Visualization of Pangenomic Diversity	Mohamed Mourdas
Poster #32	Using pangenome graph to perform association studies	Carrette Camille
Poster #33	Wolbachia population genomics across mosquito organs in single Culex pipiens individuals	Reveillaud Julie
Poster #34	Are your organisms functionally hyper-diversified? Dinoflagellates as a case study, and LAGOON-MCL as a user-friendly tool designed to study them	Rousseau Jérémy
Poster #35	Development of a blood-based transcriptional biosignature for the detection of cattle infected with Mycobacterium bovis, which causes bovine tuberculosis	Machugh David
Poster #36	Neural network-based cross-species chromatin annotation goes beyond sequence conservation	Demars Julie
